

About

Amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna

Origins

Quantum Care was founded in 2025 in Italy, to give clinical researchers access to the kind of methodological and statistical support that is usually only available inside large academic centres: rigorous, involved from the first idea, and honest about what the data can support.

Clients

We work with hospitals, universities, scientific societies and companies in Italy and across Europe, in Italian and English. Projects range from a single sample-size memo to multi-year collaborations on registries, guidelines and research tooling.

Research

Alongside client work we run our own research programme on research methods and on the responsible use of large language models in evidence synthesis, and we publish the tools that come out of it as open source.

Team

Founder – biostatistician and research methodologist
[Two or three sentences: training, years of experience, fields of clinical research, notable collaborations or publications.]

HOW WE WORK

Principles we do not negotiate on

Pre-specified and transparent	Protocols, analysis plans and review protocols are written and, where appropriate, registered before the work starts. We report to the relevant guideline (CONSORT, STROBE, PRISMA, TRIPOD+AI, ACCORD) every time.
Honest about uncertainty	We say what the data can and cannot support. A sample-size memo that flags a fragile assumption is worth more than one that hides it.
Reproducible by default	Every analysis ships as version-controlled code with a data dictionary. You – or a reviewer – can re-run it and get the same numbers.
Data protection built in	Patient data stays within the client's infrastructure and under a data-processing agreement. Our public tools use synthetic data and run in the browser.
Automation with a human in charge	We use large language models to remove drudgery, never to replace judgement. Every automated step is validated against human work, disclosed and auditable.
Independent	We have no stake in the result. Our only deliverable is a method that holds.

DOES ANOTHER USERS ALREADY ASKED WHAT YOU ARE LOOKING FOR?
